INTERNATIONAL

## Letter from Phil Harvey

---

**DKT is proud to be playing a major role in providing women and men with choices to plan their families and protect themselves from disease.** We served more than 22 million couples in 2010. As a result, DKT programs averted an estimated 5.1 million unwanted pregnancies, over a million unsafe abortions, and 11,000 maternal deaths.

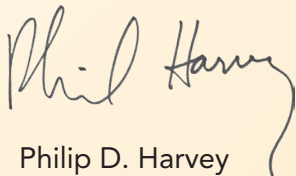

Our programs are diverse in strategy and scope, capitalizing on local knowledge and opportunities, but united in their singular commitment to improving health and life for the people they serve, especially the poor and underserved. This includes our two new programs in Ghana and Morocco.

An important new development in reproductive health is the rapidly increasing worldwide availability of misoprostol. This drug saves mothers' lives by helping control post-partum bleeding, and it can also be used to induce a safe early abortion. DKT is helping make this life-saving drug available as widely as possible.

Our relentless focus on financial efficiency continues to make DKT a compelling investment for donors. In 2010, our cost per CYP was less than \$2, the lowest of any family planning organization in the world.

Our success would not be possible without the dedication and commitment of the 1,800 DKT employees spread across 18 countries, our partners in those countries, and the donors who provide both financial and moral support to our efforts. We thank them and look forward to continued success in coming years.

Sincerely,

Philip D. Harvey  
*President, DKT International*

**D**KT International is a not-for-profit organization whose core mission is the provision of safe and affordable options for family planning and HIV prevention.

With offices and programs in 18 countries that contain more than 50 percent of the world's population, DKT is a leader in developing and managing social marketing and franchising programs that deliver broad and cost-effective impact. Named in honor of one of India's early family planning pioneers, Mr. D. K. Tyagi, DKT International has been on the forefront of international family planning service delivery for 21 years.

In 2010, DKT's committed team of more than 1,800 employees worldwide provided and sold over a half-billion condoms, almost 70 million cycles of oral contraceptives, 12 million injectable contraceptives, 800,000 IUDs, over 10 million misoprostol pills, and 800,000 medical abortion (mifepristone/misoprostol) packs, as well as emergency contraception, hormonal implants, and manual vacuum aspiration kits.

DKT is committed to cost-effectiveness in its programs, including cost recovery and financial sustainability. Revenue from the sales of contraceptives and family planning services in 2010 was over \$75 million and covered 66 percent of operating costs. In

### DKT's contribution to the Contraceptive Prevalence Rate (CPR) is important in these countries

### Where we work

- Ethiopia • Sudan • Democratic Republic of Congo
- Vietnam • Mexico • Brazil • Thailand • China
- Philippines • India • Indonesia • Malaysia
- Egypt • Turkey • Ghana • Morocco
- Mozambique • South Africa

2010, grants and contributions totaled approximately \$28 million, including the donation of contraceptives.

In 2010, DKT received the coveted honor of being named #1 in Charity Navigator's list of top 10 consistently excellent charities. In addition, for the sixth year in a row, DKT also earned Charity Navigator's 4-star rating for "sound fiscal management," a feat attained by only four percent of America's nonprofit organizations.

**In 2010, through programs in 18 countries, DKT served 22 million couples, using standard conversion factors for couple years of protection (CYP). This makes DKT one of the largest private providers of family planning in the developing world, and represents service to approximately 11 percent of all couples using modern spacing methods in the developing world, excluding China.**

**DKT programs are highly cost-effective, providing products and services to couples at less than \$2 per couple annually. DKT's headquarters expenses are only about 2 percent of total budget.**

# Saving Lives through Family Planning

## Increasing Access to Contraception

In the developing world, almost one billion women of reproductive age want to avoid pregnancy, but many are not using any contraception or rely on traditional methods that are not effective. Obstacles to contraceptive use include a lack of knowledge about contraception or its availability, concerns about the side effects of contraceptives on health, and cultural or familial objections to using contraception.

Today, DKT is providing safe, affordable, and effective family planning products and services — in some cases with dramatic impact. In the Philippines and Ethiopia, DKT provides an estimated 50 percent of all modern family planning methods. In Sudan, DKT is the country's main private distributor of IUDs and MVA kits.

***DKT's program in Sudan has trained thousands of midwives on IUD insertion and removal, enabling rural women to finally have access to long-term family planning.***

## Empowering Consumers

DKT places a major emphasis on educating and empowering groups with particular needs, such as poor women, marginalized and vulnerable populations, adolescent girls, and youth, so that they can fully understand and make use of their available reproductive health options. DKT programs help increase access to and use of contraceptives among low-income and underserved groups in the countries where we work, as illustrated in the case studies below of Ethiopia and Indonesia.

## Ethiopia

DKT Ethiopia's program reached nearly 2.5 million couples with family planning in 2010 and sold more than 85 million condoms for HIV prevention. Working in close partnership with the government, DKT now provides an estimated 57 percent of all modern contraceptive methods in Ethiopia.

***In the Philippines, DKT has made affordable contraceptives widely available through more than 10,000 government clinics branded as "PopShops," which sell family planning products, often in rural and hard-to-reach areas. DKT has social franchising programs in Indonesia, the Philippines, Mozambique, and India.***

# Saving Lives through Family Planning

DKT Ethiopia began operations in 1990 with the introduction of *Hiwot Trust* condoms. Today, DKT markets four brands of condoms, three brands of oral contraceptives, an injectable contraceptive, an emergency contraceptive, and several other reproductive health and child survival products.

DKT Ethiopia operates nationwide with extensive coverage in both urban and rural areas. This wide-ranging distribution is achieved through a combination of DKT's own dedicated sales team, NGO and public sector partners, and more than 175 Youth Clubs throughout the country. The Youth Club distribution network — known as the Young Marketers project — is an income-

**DKT** sold 595,000,000 condoms in 2010—enough to go around the earth more than 2.5 times.

**In 2010**, DKT programs averted an estimated 5.1 million unwanted pregnancies, 1 million unsafe abortions, and 11,000 maternal deaths.

generating project for youth that over the last four years has distributed more than 55 million condoms to thousands of small shops and other non-pharmaceutical outlets.

DKT Ethiopia's programming includes "Wise-Up," a condom-promotion

***In Ethiopia, DKT is working to increase condom use through events like this parade during a holiday celebrated primarily by women. DKT Ethiopia distributed more than 85 million condoms in 2010.***

# Saving Lives through Family Planning

activity targeting sex workers and their clients. “Wise-Up” is one of Africa’s largest programs of its kind and incorporates a wide range of activities, including peer education, alternative income-generation skills training, and the development of communication materials.

DKT Ethiopia’s social marketing program is currently funded by five donors with core funding provided by a joint grant incorporating the combined support of three donors. This cooperative arrangement reduces paperwork and streamlines

reporting, resulting in a more efficient project.

## Indonesia

In 2010, DKT Indonesia sold over 116 million condoms, 18 million oral contraceptives, 9 million injectable contraceptives, and more than 170,000 IUDs. Today, DKT Indonesia is the largest private family planning and social franchise program in the developing world, serving nearly 6 million couples — or 25 percent of all couples using contraception in Indonesia.

One of the keys to DKT’s success in Indonesia has been the *Andalan* (meaning ‘reliable’) social franchise of midwives. DKT Indonesia has developed a strong relationship with midwives, the key providers of reproductive health services for the lower income and rural segments of Indonesia society. Working together and through central, regional, and provincial midwife associations, DKT Indonesia reaches an estimated 15,000 midwives monthly through franchise agreements and other means, providing materials, technical support, and products. More than 40,000 midwives have been trained in IUD and implant insertion and removal under the program.

Over 6,000 midwife clinics have joined DKT’s *Andalan* social franchise network. These clinics carry *Andalan* signage, are regularly supplied with a range of products, including IUDs, injectable contraceptives, and misoprostol, and enjoy priority access to DKT’s training programs. These franchises are providing family planning and pre- and post-natal care to millions of Indonesian women who do not have access to doctors and hospitals.

*“Pakai IUD Andalan, suami tetap nyaman... Pasang Yuk!”*

*Pasang yuk!*

Sekali pasang, aman 10 tahun

***In Indonesia, the largest Muslim nation in the world, DKT provides 25 percent of all modern contraceptive methods. This advertisement encourages people to consider IUDs by counseling that they do not affect a couple’s sex life.***

# Providing Safe, Affordable Abortion

**A**lthough the number of induced abortions has been declining globally, in 2010 there were approximately 42 million abortions worldwide. Over 30 million of them occurred in developing countries. About one in five pregnancies ends in abortion, and, according to the World Health Organization, one in eight pregnancy-related deaths were due to unsafe abortion.

Because unsafe abortions increase maternal mortality and impair maternal health, DKT provides safe, affordable abortion wherever it is legal. These include abortions performed by health providers using manual vacuum aspiration kits and the provision of medical abortion drugs (mifepristone and misoprostol).

DKT stresses the importance of *safe* abortion by registering abortion products and by implementing advertising, education, and outreach campaigns that reach at-risk women, especially in rural and poor areas. In some countries, DKT has pioneered activities that promote safe and affordable abortion. For example, DKT was the first organization in India to run advertisements on national television about medical abortion. These advertisements can be seen on YouTube under DKT India.

**a-Kare**  
Combipack of mifepristone and misoprostol tablets

- Widely recommended as a first-choice drug <sup>1</sup>
- A simple and safe method for use in developing countries <sup>2</sup>
- Less overall complication rate <sup>3</sup>
- No effect on future fertility <sup>3</sup>
- Achieves high success rate <sup>3</sup>

The safe, simple and effective alternative to surgical abortion

... mifepristone 200 mg and home administration of vaginal misoprostol 800 mcg at 48 h is highly effective and acceptable to women < or =63 days pregnant <sup>4</sup>

... empowering people with the freedom to live a better life

**DKT India provides safe, affordable medical abortion pills to physicians and consumers. DKT is probably the first organization in the world to run advertisements about medical abortion on India national television.**

**DKT** is a leader in the provision of safe abortion products and services. In a number of countries, including Mozambique, Ethiopia, and India, DKT is making manual vacuum aspiration kits and medical abortion drugs (misoprostol and mifepristone/misoprostol combination packs) increasingly available to rural and hard-to-reach consumers. In 2010, DKT provided 1.5 million safe abortion doses.

## Reaching the Poor

To ensure that product pricing is affordable to poor people, DKT utilizes a well-established formula to determine consumer prices for a one-year supply of contraceptives. In this way, and by carefully checking the prices for everyday consumer goods like a cup of tea or a single cigarette, DKT ensures that its contraceptives are affordable. In Ethiopia and the Democratic Republic of Congo, for example, DKT's condom brands are subsidized at less than 2¢ each to reach the poorest segments of the population.

In addition to affordable pricing, the issue of availability is critically important. DKT takes extra care to ensure that family planning products and services are available in rural, hard-to-reach, and low-income areas. In Bihar, India, for example, very poor women and men take advantage of the free sterilization procedures provided by DKT's teams operating in remote government clinics.

In India, DKT also holds educational meetings in rural villages and operates informational kiosks at local religious and cultural festivals providing free contraceptive samples. In Nanjing, China, and Mumbai, India, DKT sells inexpensive condoms to sex workers in low-income, high-risk settings. In Ethiopia,

***In the state of Bihar, India, DKT-trained health providers play a major role in providing family planning services to young women. DKT focuses on ensuring that poor and underserved populations have ready access to affordable contraceptives.***

Sudan, Mozambique, and the Democratic Republic of Congo, DKT responds to local government and NGO requests to provide temporary supplies of free contraceptive commodities to meet shortages or respond to other priorities.

**The Democratic Republic of Congo (DRC)** faces many serious health challenges, including a declining contraceptive prevalence rate of less than 8 percent. In response, DKT DRC is training doctors, nurses, and paraprofessionals to provide reproductive health-related counseling and services, including the insertion and removal of IUDs. DKT also will be working closely with the head of the Armed Forces of the DRC's reproductive health program to train providers in clinics to advise army personnel about contraceptives.

# Preventing HIV/AIDS

In 2010, approximately 33 million people were living with HIV, the virus that causes AIDS. Each year, over 2 million more people become infected with HIV and 1.8 million people die of AIDS.

Because HIV/AIDS is a serious problem in many developing countries and especially in sub-Saharan Africa, DKT routinely provides essential information about HIV/AIDS in its educational and marketing materials. In 2010, DKT sold 595 million condoms, helping to reduce the risk of sexually transmitted diseases, including HIV. Around the world, DKT focuses on people engaged in high-risk behaviors, including sex workers in Philippine brothels, injecting drug users in Indonesia, truck drivers in Democratic Republic of Congo, soldiers in Ethiopia, and gay groups in Brazil.

Since 2006, DKT Vietnam has been selling clean needles to intravenous drug users along Vietnam's border with China and Cambodia to reduce the transmission of HIV. DKT also has created an unusual public-private condom distribution network by partnering with HIV authorities in Vietnam's provinces

***DKT develops innovative solutions to the global HIV epidemic. In South Africa, DKT's field workers go door-to-door to provide information and mobilize over 200,000 residents to take action about HIV/AIDS.***

***An advertisement for Prudence condoms in Brazil promotes condom use both for increased protection and for pleasure. This year, DKT Brazil celebrated selling its one-billionth condom.***

who act as a bridge between DKT and over 2,000 nontraditional outlets, such as bars, karaoke clubs, night clubs, and hotels.

In Ethiopia, DKT produced two films for young audiences about "The HIV Superhighway" ([www.wiseupprogram.org](http://www.wiseupprogram.org)) about concurrent partnerships and HIV prevention.

DKT's most ambitious program to curb HIV transmission is taking place in Xhosa-speaking Khayelitsha Township outside Capetown, South Africa. In this unique effort, DKT uses Xhosa-speaking field workers in a door-to-door approach to get families to discuss sexually transmitted infections and HIV/AIDS. Since the program began in 2009, field workers have personally interviewed over 200,000 people and provided referrals for needed health services.
