| <b>Total</b>   | 25,042,636 | 19,200,597                 | 1,045,300,000             |   |  |                                      |

**NOTES**

**1.** Abortion is not included in the PRB (or DHS) enumeration and is thus eliminated here. IUDs and implants are assigned multiple CYPs in the year sold/inserted. This multiplier is reduced here (70% for implants; 65% for IUDs) to reflect an estimate of current users, including users from prior year insertions. **2.** All figures for column E from PRB (2012) except as follows: Malaysia-UN WCU (2011); India Bihar-IDHS (2006). **3.** The CPR figure for Sudan (6%) is out of date; current estimate substituted here. **4.** DKT contribution is understated to the extent that column E data is based on women in union and column F data is based on all women of reproductive age.

## DKT Contribution to CPR in Select Countries 2012

*\*Percentages in parenthesis represent the proportion of all women using modern method contraception who have been served by DKT in 2012.*
