TOTAL	24,570,313	17,909,514	686.4				

[#]Note 1. Abortion is not included in the PRB (or DHS) enumeration and is thus eliminated here. We implemented more demanding calculations this year for sterilizations, IUDs, and implants to reflect attrition over multi-year CYPs in the year performed /inserted /sold. This multiplier is reduced here to reflect an estimate of current users, such that IUD sales are multiplied by a factor of .65 and implants by .70 based on conservative approximations of attrition over 5 years and 3 years, respectively. *Note 2. Published PRB CPR data (column E) for Ethiopia are out of data; most recent figure available from DHS 2011 data used here. **Note 3. Published PRB CPR numbers (column E) for Malaysia and DR Congo are unavailable; UN WCU, 2011 data used here. ***Note 4. Published CPR numbers (column E) for Sudan are out of date. Current estimate substituted here.

**Percentages in parenthesis represent the proportion of all women using modern method contraception who have been served by DKT in 2011*
